Hello my name is Robert and I want to tell you about the impact the family History Program made in my Life. I first became aware of the FHP through the Daily Planet, I had a interview with a staff member of the FHP and she asked me question about my family history, I made her aware of my family life long struggle with diffent typs of cacers, from my father who died of coloncancer and four uncles who also died from cacer. From some of the information that I gave to the FHP, my doctor ~~was~~ knew that I was at high risk for cancer. So She ~~[illegible]~~ ~~made~~ suggested that I have a colonoscopy, which came back positive. So without the FHP I would not knowd that I was in danger. Now I could get the treatment that I need to save my life. So I Thank you To the family History Program.
